Duration: 1 day.

A 7-hour training programme for those trained or working with OHSAS 18001.

CPD value: 7 points.

Boost your CV and your Continuing Professional Development record.

Personal tuition option.

Arrange this module as a 1-2-1 in our Virtual Classroom, or groups in-house.

Discover the benefits of ISO 29001.

If you work in the oil, gas, or petrochemical industries, ISO 29001 is a standard your workforce needs to know. While ISO 9001 is the international standard for general Quality Management Systems, ISO 29001 provides sector-specific requirements that are unique to your industry. Our 1-day ISO 29001 training course will give you and your team a deeper understanding of the industry's challenges and equip you with the knowledge and skills to effectively manage them, improving your company's operations and ensuring compliance with industry standards. It's a wise investment for senior managers seeking to ensure their workers are proficient with their Quality Management System, and contributing to the business's ongoing success.

Your immediate business benefits from this course.

A workforce-wide understanding of ISO 29001 can provide several benefits to your company:

Improved compliance with industry standards.

By understanding the specific quality management requirements of the oil and gas industry, staff can ensure the company is compliant with ISO 29001, reducing the risk of non-compliance and associated penalties.

Enhanced operational efficiency.

Their knowledge of ISO 29001 can help identify inefficiencies in the company's processes and procedures, enabling you to implement improvements that enhance productivity and reduce costs.

Better risk management.

ISO 29001's focus on risk-based thinking means staff are equipped to identify and manage risks specific to the oil and gas industry, such as environmental risks and supply chain disruptions, reducing the likelihood of incidents and improving overall safety.

Improved customer satisfaction.

By implementing effective Quality procedures, your company can enhance customer satisfaction by delivering products and services that consistently meet or exceed their expectations.

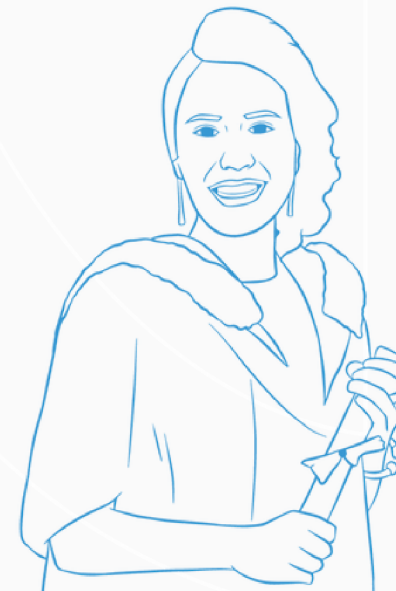

What will I learn?

This SQMC-certified ISO 29001 Awareness course covers the basic concepts, principles, and requirements of the ISO 29001 standard for Quality Management Systems (QMS) in the oil, gas, and petrochemical industries.

Participants will gain an understanding of [the sector-specific requirements](#) of the standard, including risk-based thinking, competency and training, supply chain management, and asset integrity management.

They will also learn about the importance of effective documentation and record-keeping, as well as the benefits of continual improvement and customer satisfaction.

By the end of the course, participants will have a solid foundation in ISO 29001 and be [better equipped](#) to implement, maintain, and audit a QMS in the oil, gas, and petrochemical industries.

Trusted

"The tutors created a unique, open atmosphere, thoroughly engaging. I left the course with the confidence to put my new skills immediately into practice."

DAMIAN TREMLETT, Project Manager,
Sword Technology Services (UK).

A global standard in auditor certification.

SQMC began in 1989 as an ancillary unit within the Management Sciences faculties of one of the United Kingdom's leading universities, providing short auditing courses accredited by the International Register of Certificated Auditors (IRCA). Within four years we were awarded Centre of Excellence status by the Institute of Quality Assurance (now called the Chartered Quality Institute).

SQMC has since evolved into an independent, private training supplier to individual students and multinational corporations in 88+ countries.

99% of participants earn their globally-recognised certificate, 1st time.

Friendly guidance for your Training Needs Analysis.

Top tuition from leading, practicing QHSE auditors.

First-class aftercare and learner support you can count on.

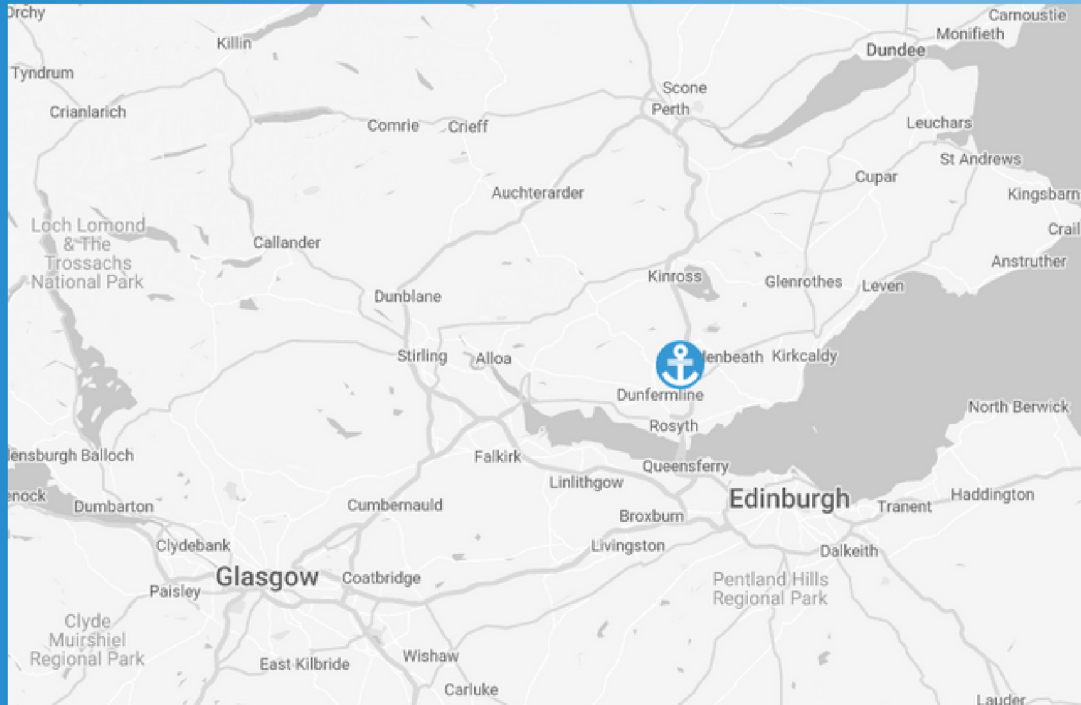

Certificate verification service for current / future employers.
