Duration: 1 day.

A 7-hour training programme for those trained or working with OHSAS 18001.

CPD value: 7 points.

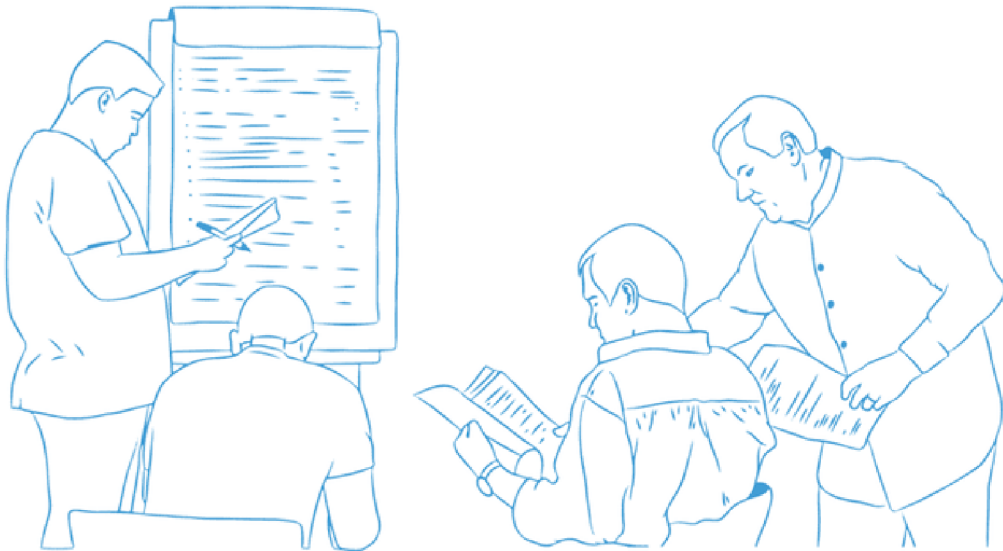

Boost your CV and your Continuing Professional Development record.

Personal tuition option.

Arrange this module as a 1-2-1 in our Virtual Classroom, or groups in-house.

A highly participative and thought-provoking workshop for H&S, HR, compliance, risk, and operational managers - and their teams.

ISO 45003 might be 'the new kid on the block', but its focus on psychosocial health and wellbeing at work is going to have a significant impact on - and bring benefits to - organisations keen to provide appropriate care for their staff within the workplace.

Your training will be delivered by Jennie Clark, a 3rd party certification body auditor and system implementer, who has a particular interest in this standard and its benefits.

Jennie is the author of 'Simple Systems' - a series of easy-to-read guides to management system standards, available from Amazon.

Why learn about ISO 45003?

ISO 45003:2021 describes how to manage psychological risk in an ISO 45001-based Occupational Health and Safety (OH&S) management system. It enables organisations to prevent work-related illness and injury to their employees and other interested parties and to advance workplace wellbeing.

It may be used by organisations of all sizes and across all industries and sectors to create, maintain, and constantly enhance safe and healthy working environments; and will form an important and sizable element of an overall, ISO 45001-based Occupational Health and Safety Management System.

What will I learn?

Our ISO 45003 Awareness course provides an introduction to the standard and its requirements, and covers topics such as the definition of psychosocial risks, the impact of these risks on individuals and organizations, and strategies for managing and mitigating these risks.

Additionally, we'll consider the importance of employee well-being, the legal and regulatory framework surrounding workplace health and safety, and the benefits of implementing ISO 45003.

The course is designed to help your staff understand the importance of managing psychosocial risks and provide guidance on how to implement best practices to create a healthier and safer workplace.

What's included?

Each learner will receive:

- Coaching from an experienced Chartered Quality Professional.
- A globally-recognised certificate.
- SQMC's highly-acclaimed aftercare.

Trusted

"The tutors created a unique, open atmosphere, thoroughly engaging. I left the course with the confidence to put my new skills immediately into practice."

DAMIAN TREMLETT, Project Manager,
Sword Technology Services (UK).

A global standard in auditor certification.

SQMC began in 1989 as an ancillary unit within the Management Sciences faculties of one of the United Kingdom's leading universities, providing short auditing courses accredited by the International Register of Certificated Auditors (IRCA). Within four years we were awarded Centre of Excellence status by the Institute of Quality Assurance (now called the Chartered Quality Institute).

SQMC has since evolved into an independent, private training supplier to individual students and multinational corporations in 88+ countries.

99% of participants earn their globally-recognised certificate, 1st time.

Friendly guidance for your Training Needs Analysis.

Top tuition from leading, practicing QHSE auditors.

First-class aftercare and learner support you can count on.

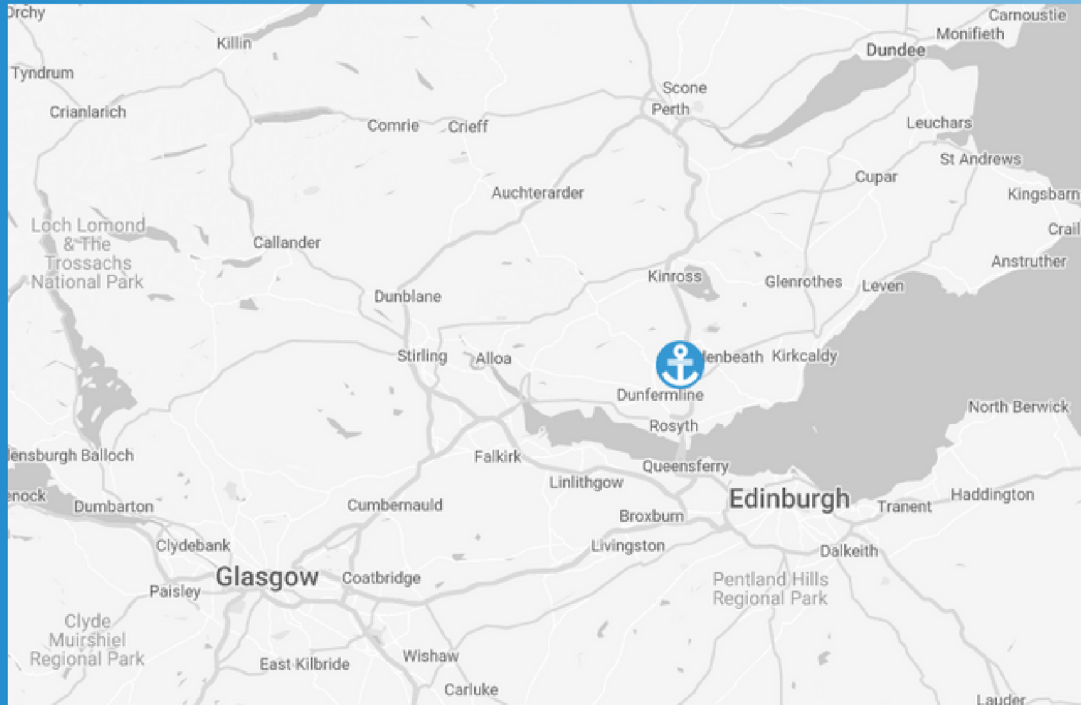

Certificate verification service for current / future employers.
