Learn. Quality. Simply.

Contents

Upskill face-to-face at your nearest SQMC venue.

In-person courses at our headquarters, near Edinburgh Airport; and Aberdeen.

**Alternatively, attend one of our regular online courses.**

Our acclaimed Virtual Classroom version is custom-built for desktop learning.

Private staff training at a time and place to suit you.

Arrange a course exclusively for groups of 3 or more, in-house or online.

Learn to plan, prepare for, conduct, and report on internal audits of a Quality Management System.

We've simplified the subject of auditing your organisation's Quality Management System, to help you learn (faster) how to conduct them (excellently).

The beauty of our approach is we use trainers that audit a broad spectrum of sectors when they're not in the classroom, meaning you can fully relate personally to the examples we illustrate.

This brings the theory to life and is one of many reasons SQMC-trained auditors stand out from the crowd.

How will I, or my employer, reap the rewards from my training?

Benefits

At SQMC, our qualified trainers are all experienced, practicing auditors; and when not auditing or training, they are implementing and maintaining Quality Management Systems for clients. The upshot of this down-to-earth practicality, when combined with their keenly-honed aptitude to educate through accelerated learning techniques, is that you'll grasp the subject far better – becoming an (even greater) asset to any employer. You'll make a difference by working in 'solution mode', using your new skills to identify any risks within your organisation's processes.

Your ISO 9001 Internal Auditor training will be expertly layered and matched to your own learning styles, preferences, and pace. We want to ensure you get the most out of your time with us. What's more, we believe that learning and having fun should not be mutually exclusive!

What will I learn?

Participants in this interactive ISO 9001 Internal Auditor course will experience practical audit scenarios based on dynamic case studies. We help you try out auditing protocols and techniques in a safe and comfortable environment.

Your SQMC trainer encourages your questions – no matter how basic you may think they are – as part of a series of lively and inclusive discussions. In only two days you can learn, understand and appreciate all of the following:

- The principles, methodology, preparation, and performance of the quality audit (to universal best practice set by the ISO 19,011 Guidelines - part of our complimentary Standards pack worth £650).

- The key to selecting the audit sample, and deciding the best questions to ask (with tips as to the most effective phrasing of your questions).

- How to prepare the findings and statements for a Corrective Action Report.

- Master the art of straightforward Audit Reporting.

- A look at Corrective & Preventive Action, the follow-up process, and then surveillance.

Syllabus

★★★★★

Trusted

"The tutors created a unique, open atmosphere, thoroughly engaging. I left the course with the confidence to put my new skills immediately into practice."

DAMIAN TREMLETT, Project Manager,

DIAGEO

A global standard in auditor certification.

SQMC began in 1989 as an ancillary unit within the Management Sciences faculties of one of the United Kingdom's leading universities, providing short auditing courses accredited by the International Register of Certificated Auditors (IRCA). Within four years we were awarded Centre of Excellence status by the Institute of Quality Assurance (now called the Chartered Quality Institute).

SQMC has since evolved into an independent, private training supplier to individual students and multinational corporations in 88+ countries.
